OVERVIEW

- 6 L hygiene waste bin with lid and manual operation. Specifically designed for hygiene waste.
- The top lid prevents the contents from being visible.
- Suitable for washrooms with very high traffic. Model suitable for public and commercial facilities.
- Suitable for floor standing or wall mounting using two plastic wall plugs and two stainless steel screws, supplied with the product.

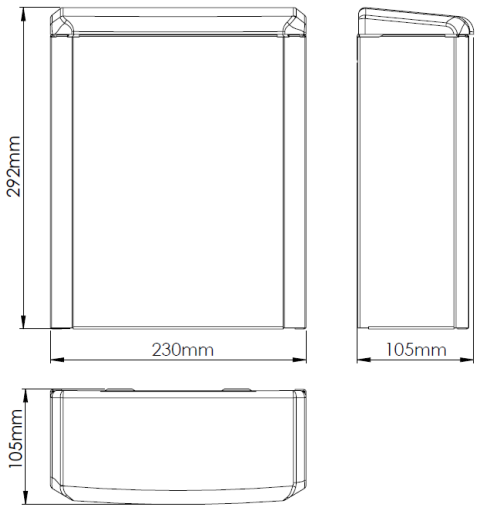

TECHNICAL DATA

Net weight	*1,5 kg*
Body thickness	*0,8 mm*
Lid thickness	*0,8 mm*

COMPONENTS AND MATERIALS

- **Lid:** One-piece construction, with no joints. Projects 3.5 mm beyond the body to facilitate opening.
- **Body:** Connected to the lid by two pivot pins, allowing the lid to rotate.

DIMENSIONS

6 L hygiene container

GUIDE SPECIFICATION

Wall-mounted hygiene waste bin with lid. The container shall have a weight of 1.50 kg. The body shall be manufactured from steel with a white or black finish, or from AISI 304 stainless steel with a bright or satin finish. The body and lid shall have a thickness of 0.8 mm. The container shall be suitable for floor standing or shall be mounted on the wall using 2 screws and 2 wall plugs. The container shall have a capacity of 6 L.

ASSEMBLY / RECOMMENDED INSTALLATION HEIGHTS

Fix the hygiene container on the wall using the provided screws through the mounting back-plate holes (points indicated by an “S” in the bottom figure).
