REVISION:
07-26

10L hygiene container

GUIDE SPECIFICATION

Wall-mounted hygiene waste bin with double lid. The container shall have a weight of 3.03 kg. The body shall be manufactured from steel with a white or black finish, or from AISI 304 stainless steel with a satin finish. The body and lid shall have a thickness of 0.8 mm. The top section shall be removable and shall incorporate an integrated handle and waste container. The unit shall be suitable for floor standing or wall mounting. The container shall have a capacity of 10 L.

ASSEMBLY / RECOMMENDED INSTALLATION HEIGHTS

Place the waste bag around the plastic ring. To facilitate installation of the bag, the plastic ring tilts. Once the bag is fitted around the ring, return it to the horizontal position and secure it to the tabs on the body.

Mediclinics S.A. reserves the right to make changes or modifications to the products and their specifications without prior notice.
